Option 1_____

THE BUSINESS CARD PUBLIC ACCESS PROPOSAL AGREEMENT

We are establishing a local accessible system - called the **Card Wallet** - for all BUSINESS CARDS in your area, where your local public will now be able to access, save, and also distribute your business card electronically, by means of their smartphones. There will be no charge for the referrals that the card wallet system will generate. **There is only an accessibility fee for \$300 for the whole year - or \$25 a month.** The services and results **are guaranteed** and there is no contract... We would like to have the honor of including your Business Card in this/our CARD WALLET SYSTEM.

All we will need is to initiate your service so we can generate a card ID for your business, then I will provide you with the mailing address to mail us a copy of your business card so we can digitalize it and process it to our system. We will not charge your charge card until we are ready to setup your card portals, all we will do today is to put that card on file for processing.

TANGIBLE FEATURES OF THE CARD WALLET:

1. People can also access your business card from the Card Wallet Through Google....
2. Your Business Card Looks Better when it is digitalized.
3. Your Business Card in its digitalized form will never loose its enhanced appearance with time

4. There is no limit to how many or how much distribution can be done from customer to customer. Thus giving you 5 points for everytime a person saves your card
5. Your Business Card have hotlinks where people can access it easier and interact with your business easier.
6. Your customers have the card wallet on their smartphones and your beautiful digitalized business card is in that Card Wallet. It will be there permanently. There is no chance of every loosing it - unlike giving somebody your paper business card where it is found that people on average are not able to produce a business card that they were givin after 1 year, and 85% of the time the potential customer is not able to retrieve the card when they are ready for the service.
7. It is too hard to establish a customer base issuing paper business cards because the recipients are mostly without those business cards after less than a year on average. Therefore, your business is not growing by way of issuing out paper business card.

ADVERTISING, MARKETING AND PROMOTING TOOLS

1. The Card Wallet **creates a customer base** for your business by archiving your *Card Savers* and allowing you to blast out email to up to 300 card savers per day, with your contents and/or flyer or any content or information you want to provision to your customers.
2. Anything that you publish through your card wallet will eventually be accessible on line to the public.

OFFER PRICE \$300 A YEAR.

Option 2_____
